1. Epitome & Sovereign Architectural Vision

The **FG190 Sovereign AI Execution Sandbox** establishes an isolated, quantum-resistant runtime environment utilizing eBPF and WebAssembly primitives. By encapsulating arbitrary AI code, tool mutations, and smart routines inside non-root sandboxes, FG190 guarantees mathematical safety and absolute state isolation. Every execution step generates SHA3-256 cryptographic proofs anchored into a Zero-Knowledge (ZK) audit attestation log for continuous institutional compliance.

"And he shall be like a tree planted by the rivers of water, that bringeth forth his fruit in his season; his leaf also shall not wither; and whatsoever he doeth shall prosper." — **Psalms 1:3**
